

Chapter: 6

Q.1 Differentiate the following

2

- 1** Differentiate between 7/12 Extract and Property Card

Ans	7/12 Extract	Property Card
	i. The detailed information of rural land is recorded in 7/12 extract.	i. The detailed information of urban areas is recorded in property card.
	ii. The records of the extract are kept by public revenue department.	ii. The records of property card are kept by city survey office.
	iii. 7/12 extract includes the ownership of agriculture land.	iii. Property card includes the records of non-agricultural land.

Q.2 State whether the given statement is right or wrong and correct the wrong one.

7

- 1** Extract 12 indicates change in ownership.

Ans Incorrect : Extract 12 indicates tracts under cultivation.

- 2** There are factories in the Central Business District (CBD)

Ans Incorrect : There are commercial complexes in the Central Business District.

- 3** The village attendant issues the 7/12 extract.

Ans Incorrect : The village Talathi issues the 7/12 extract.

- 4** In urban areas the largest area is used for residential purpose.

Ans In urban areas the largest area is used for residential purpose - **Correct.**

- 5** In rural areas residential areas occupy large tracts.

Ans Incorrect : In rural areas residential areas occupy small tracts.

- 6** Mining is not a type of land-use

Ans Incorrect : Mining is a type of land use.

- 7** Extract 7 indicates Record of Rights.

Ans Extract 7 indicates Record of Rights - **Correct.**

Q.3 Give Geographical Reasons

6

- 1** A region can be classified as developed or developing on the basis of landuse.

Ans i. The landuse for agriculture, forests or pasture indicates that the region is developing.
ii. The landuse for commercial purposes, transport, recreation, indicates that the region is developed.
iii. So according to landuse the region can be classified as developed or developing.

- 2** Landuse of public facility are extremely important in urban areas.

Ans i. Public utility services are provided by the government at different areas.
ii. The growing population demands more utility services like post offices, police stations, play grounds, schools, colleges and universities.
iii. These utility services diffuse the tensions caused by growing population. Therefore land use for public facility are extremely important in urban areas.

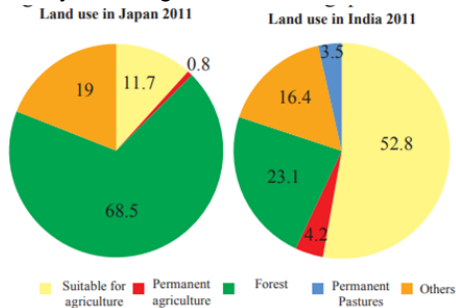

3 The record of the ownership of non-agricultural land is the same as that of agricultural land.

- Ans** i. The record of agricultural land is maintained in the 7/12 extract, like ownership rights of a family, debt, area under cultivative.
- ii. Similarly the record of ownership of agriculture of land is maintain in the property card, like ownership, plot number, city survey, tax accessed on the piece of land. Thus the records of ownership of non-agricultural land as well as agricultural land are the same.

Q.4 Answer the following by reading the graph/diagram

24

1 Study the Diagram of the text book and answer the following.

- i. Which land use is found in Japan ?
- ii. Considering the land use in both the countries make a list of factors affecting land use ?

Ans i. Agriculture land use, forests land use, grass land and other land use are found in Japan.

- ii. Considering the land use in both the countries the factors land use are as follows.

सुचना : या संकेदपत्राच्यावर दर्शविलेली माहिती ही कोणत्याही शासकीय जगता कागदोपार खासीसाठी वापरता येणार नाही

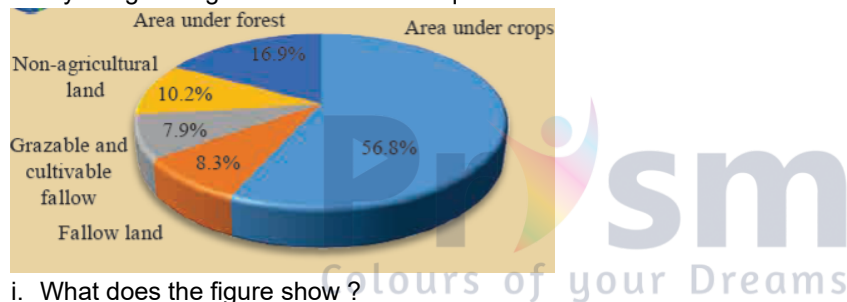

3 Give the answers on the basis of figure

- What would be the impact of this on India's environment ?
- Can a decline in the area under agriculture is equated with food shortage ?

Ans i. It shows that India is an agrarian country and its environment is more natural.
 ii. Decline in the area under agriculture cannot be equated with food shortage because food production is directly related with population. If the population is more, yes there could be shortage of food grains but if the population is less, there could not be shortage of food grains.

4 Study the given figure and answer the questions.

- What does the figure show ?
- Can you name the diagram or the figure.

Ans i. The figure shows Maharashtra state land use in 2010 - 11.
 ii. It is called pie diagram.

Q.5 Answer in detail/ brief

1 Why is agriculture important in rural land use.

Ans i. In India agriculture is the main occupation of the people in rural areas.
 ii. Cultivable land is found more in the rural areas.
 iii. In India agriculture contributes more in national income. It is important because it satisfies the need of food to growing population.
 So agriculture is an important occupation in rural land use.

2 State the factors affecting land use ?

Ans i. The factors affecting rural land use are :
 Climate, soil, type of slope, irrigation facilities, natural resources, government policies.
 ii. The factors affecting urban areas are :
 Locations and sites, natural resources, housing development policies, transportation routes, industrialization, trade and commerce, play grounds and entertainment facilities and government policies.
