Q.4 Read the following extract and answer the question below (any four) : (4)

Q.4

Diagnosis is the skill of identifying a disease. It is carried out by observing signs and symptoms of the illness. Until recently there were few medical tests to help a doctor identify a disease. Instead, doctors talked to their patients examined them and looked at their behavior.

In Greece, at the time of Hippocrates, doctors tried to identify their patients disease so they could reach their prognosis (say how the disease would develop) Greek doctors used all of their senses in making their diagnosis. Touch, taste, sight hearing and smell could all provide valuable clues.
